

TEST PLAN

Project Name

Demo OrangeHRM

Objective

The objective of this test plan is to validate core functionalities of OrangeHRM using manual testing techniques. Testing focuses on employee management, leave handling, recruitment workflows, authentication, and directory search features to ensure expected system behavior.

1. Scope

Authentication

- Login validation
- Invalid credential handling
- Logout functionality

PIM (Employee Management)

- Create employee
- Search employee
- Update employee information
- Delete employee

Recruitment

- Add candidate
- Search candidate
- Candidate management

Leave Management

- Search leave records
- Filter leave records
- Leave validations

Directory

- Employee search
- Filter validation

Out of Scope

- Performance Testing
- Security Testing

- API Testing
- Database Testing
- Automation Testing
- Cross-browser compatibility testing
- Mobile responsiveness testing

2. Test Strategy

Testing will be performed manually.

Testing Types Covered

- Functional Testing
- Positive Testing
- Negative Testing
- CRUD Validation
- Search Testing
- Filter Testing
- UI Validation
- Basic Regression Testing

3. Test Environment

Environment: OrangeHRM Demo

Testing Type: Manual Testing

Execution Tool: Qase.io

Documentation: GitHub Repository

Browser: Google Chrome

4. Test Deliverables

- Test Plan
- Test Suites
- Test Cases
- Test Execution Results

5. Entry Criteria

Testing will begin when:

- Application is accessible
- User credentials are available

- Test data is prepared

6. Exit Criteria

Testing will end when:

- Planned test cases executed
- Results recorded

7. Test Suites Covered

Authentication

- Login Successfully
- Invalid Login
- Logout

PIM

- Add Employee
- Search Employee By Name
- Search Employee By Employee ID
- Search Using Job Title / Location
- Search Non-Existing Employee
- Edit Employee
- Delete Employee

Recruitment

- Add Candidate
- Search Candidate
- Search Invalid Candidate
- Delete Candidate

Leave Management

- Search Leave Record
- Search Invalid Employee Leave
- Filter Leave By Status

Directory

- Search Employee

- Invalid Search
- Reset Filters

8. Risks

- Demo data may change
- Existing records may affect execution
- Environment availability issues

9. Assumptions

- User permissions are configured
- Application remains stable during execution.
